Dear Parent(s) ,

I would first like to take the time to thank you all for your continuing support of your child's preschool education. This year has been a wonderful experience and I cannot believe we are already upon Spring.

During the next month we will have many things keeping us busy at school. The children are going to see the life cycle of a butterfly. We will watch the larvae as they complete the process to become a butterfly. This month we will talk about the Spring season, flowers/plants, and how they grow. We will actually be growing our own grass here in school. The kids get very excited to see how much their grass has grown each school day. We will also explore ladybugs, birds, and their nests, the fruit food group, the color purple, the diamond shape, the letters Z and K, and the number 9.

We would like to do food tasting in our classroom of different types of fruit. There are many kinds of fruit that the children have never experienced. If there are some fruits you would like to donate, let us know which fruit you will be bringing in so that we don't get too much of one thing. Thank you again for always being there to help us. We definitely have a great group of parents.

2 kiwi 2 cantaloupe 2 ugly fruit 2 pkgs. Raspberries

2 grapples (this is not a misspelled word, there is a fruit that is a mix between a grape and apple)

2 plums 2 nectarines 2 tangerines 2 papaya 2 mango

Important dates to remember:

Friday April 4th: We have school this day, as a make up day for the days missed in February.

Monday April 14th: Food tasting experience

Friday April 18th: Purple show and tell day

Wednesday April 23rd: Spring school pictures

Friday April 25th: Make up day for February and Philharmonic presentation at 10am.

(3's and 4's AM and PM classes are invited to Philharmonic presentation if your child is not in class during the presentation you must stay to supervise).
